Cyber Security Roadmap 2025-2028

Lemonade

- This three-year, \$10 million cybersecurity roadmap will strengthen Lemonade's defenses against emerging threats and ensure global regulatory compliance.
- Key initiatives include AI-driven threat detection, robust vendor and supply chain security, advanced employee training, disaster recovery, and legacy system upgrades.
- These efforts will enhance data protection, operational resilience, and support sustainable growth, reinforcing stakeholder trust.

Risk Assessment

Lemonade

ID NO.	RISK or HAZARD DESCRIPTION	RESOURCES IMPACTED e.g., personnel, machinery	EXISTING CONTROL MEASURES	PROBABILITY LEVEL	IMPACT LEVEL	PREVENTION MEASURES
Garima	Loss of data	Entire business	No databackup process in place	High	High	Scheduling regular data backups: onsite and offsite; Creating a Disaster Recovery plan
Garima	Employee clicking on phishing links	Personnel, Data exposure	No SAT program in place	High	High	Creating and Implementing an SAT program
Christy	AI Data Poisoning	Entire business, AI-based sytems such as the Chatbot	Some; regular testing is done	High	High	Robust Data Validation; Anomaly detection algorithms, system audits
Christy	Not being in compliance with local regulations	Entire Business; incl. intl. scalability / expansion	Some, as business being done in some European countries	Medium	High	Observe frameworks: ISO cert (budget should allow), GDPR, NIST
Christy	Supply chain management risk	Entire Business and External Third-Party Vendors	No	High	High	Clear vendor regulation guidelines; Regulation compliance
Veronica	Missing assets or inventory/ Shadow IT	Entire business, Personnel, Stakeholders	No	High	High	Creating a Configuration Management tool (i.e. Service Now)
Veronica	Legacy systems running out of date software	Line of Businesses who are using EOL Legacy systems, Customers	No	Medium	High	End of Life planning for hardware and software to be defined in a
Veronica	Hardware failure and lack of disaster recovery	Entire Business, Customers, Stakeholders	No	High	High	Create a BCP and schedule DR exercise

Cyber Security Roadmap

Lemonade

	Year 1: 40% of Budget	Year 2: 35% of Budget	Year 3: 25% of Budget
Data Protection	<ul style="list-style-type: none"> ☀️ Encrypt Data ☀️ Implement DLP tools ☀️ Onsite and Offsite backups 	<ul style="list-style-type: none"> ☀️ Expand and Automate Data backup strategies ☀️ Continue enforcing encryption of all sensitive data 	<ul style="list-style-type: none"> ☀️ Implement comprehensive Data Governance Strategy for Integrity and Compliance ☀️ Implement Advanced Anomaly Detection
Security Awareness and Training	<ul style="list-style-type: none"> ◆ Launch SAT program ◆ Email filtering and Anomaly Detection 	<ul style="list-style-type: none"> ◆ Update SAT content based on emerging threats ◆ Advanced Email filtering 	<ul style="list-style-type: none"> ◆ Utilize Advanced Simulations and Scenario-based Training ◆ Implement Adaptive Training Tailored to Employee Risk Levels
AI System Monitoring	<ul style="list-style-type: none"> ▢ Introduce data validation process and anomaly detection ▢ Validate training data sets 	<ul style="list-style-type: none"> ▢ Implement anomaly detection algorithms ▢ Perform regular system audits 	<ul style="list-style-type: none"> ▢ Predictive Analytics ▢ AI-driven detection algorithms
Compliance Frameworks	<ul style="list-style-type: none"> ● Implement GRC platform ● Begin ISO 27001 certification ● Develop clear vendor regulation guide lines 	<ul style="list-style-type: none"> ● Automate compliance checks ● Continue ISO 27001 efforts ● Review & Enforce vendor compliance regulations 	<ul style="list-style-type: none"> ● Perform continuous audits ● Finalize ISO 27001 certification
Configuration Management	<ul style="list-style-type: none"> ▮ Implement Configuration Management Database ▮ Enforce policies on unauthorized hardware and software use 	<ul style="list-style-type: none"> ▮ Enhanced asset tracking to track real time updates ▮ Automate alerts for shadow IT systems 	

Cyber Security Roadmap, cont.

Lemonade

	Year 1	Year 2	Year 3
System and End of life policies	<ul style="list-style-type: none">Conduct system audits of legacy systemsCreate end of life policiesPatch/Isolate/Upgrade legacy systems	<ul style="list-style-type: none">Continue patching/isolationReplace legacy systems with modern tech aligned with EOL policy	<ul style="list-style-type: none">Finalize replacement or decommissioning of legacy systemsRebrand UpdateBlog Design Update
TPRM and Vendor Compliance	<ul style="list-style-type: none">Implement TPRM platformEstablish vendor regulation guidelines	<ul style="list-style-type: none">Mandate periodic audits for high risk suppliersImplement monitoring cybersecurity postures of key vendors	<ul style="list-style-type: none">Social Media CampaignBlog CampaignBrand Change
DR and Business Continuity	<ul style="list-style-type: none">Create DR and BCP plan with Recovery objectivesRegularly backup critical systemsSchedule DR exercises	<ul style="list-style-type: none">Perform disaster recovery drillsUpdate BCP based on lessons learned from DR exercises	<ul style="list-style-type: none">Integrate AI-driven DR planningConduct advanced simulations of hardware and software failureEnsure BCP is updated with infrastructure or regulatory changes

Anticipated Challenges

Lemonade

Challenge		Potential Impact		Mitigation Strategy	
<ul style="list-style-type: none">• Legacy Sys. Operations Continuity• Comprehensive Compliance with International Regulatory Bodies• Vendor / Supply Chain Security• AI Model Compromise• Sustained Employee Engagement in SAT programs• Balancing Budget with Security Goals		<ul style="list-style-type: none">• Vulnerabilities, Data Breaches• Potential Fines, Reputational Damage, Operational Restrictions• Supply Chain Attacks, Disruptions• Reputation, Data Integrity• Low Engagement = Exposure to Human Error Risks• Timely Execution of Key Projects, Risk of Vulnerability with Delays		<ul style="list-style-type: none">• Phased Replacement Schedule• Automation Compliance Tools, Policy Review, Monitoring Team• Vendor Assessment Program• Validate Data. Anomaly Detection• Interactive Training, Phishing Simulations, Incentivize Programs• Quarterly Budget Review, Prioritize Projects, Optimize Costs	

Key Deliverables

Lemonade

Year 1		Year 2		Year 3	
<ul style="list-style-type: none">• Automated onsite/offsite backups and a DR plan• SAT program rolled out with phishing simulations• Asset management through ServiceNow and end-of-life policies implemented• ISO 27001 certification efforts underway, aligned with NIST standards		<ul style="list-style-type: none">• Regular DR exercises and backup strategies refined.• ISO certification progress tracked and nearing completion.• Real-time vendor security monitoring and compliance audits in place		<ul style="list-style-type: none">• Finalized ISO 27001 certification.• Legacy systems replaced or isolated per the end-of-life policy.• AI-powered DR and BCP optimization.	

KPIs and Success Metrics

Lemonade

- Backup Success: 95% success rate for data backup and recovery operations.
- Phishing Awareness: 60% improvement in phishing simulation response.
- Compliance: Achieve ISO 27001 certification and full GDPR compliance.
- Shadow IT: Eliminate 90% of shadow IT systems.
- Legacy Systems: Full replacement or isolation of legacy systems by Year 3.
- DR/BCP: 80% reduction in recovery times during disaster simulations
